

Membership Application

Membership Benefits

Being tied to the leading trade organization in the dairy industry is not the only benefit of an NMPF Associate Member. This program is designed to connect other allied dairy organizations and interested individuals with dairy cooperatives and their producer members. The Associate Member status gives you access to the nation's leading milk marketing decision makers.

Associate membership offers you the unique opportunity to participate in meetings and conferences with NMPF cooperatives' managers, dairy producers and association staff at reduced cost. Associate members are also given preference in sponsorship requests, giving them valuable direct access to NMPF members.

Associate members also receive member only publications such as the News for Dairy Co-Ops, Dairy Industry News Alert, NMPF Accomplishments & Activities Report, Import Watch, Dairy Producer Highlights and first view of NMPF Press Releases.

NMPF Vision

The Federation uses its unique resources to harness the ever-changing political and marketing environments to enhance and promote the economic well-being of dairy producers and their cooperatives through coordinated industry efforts.

The Federation was organized in 1916 to provide a way for dairy producers and the cooperatives they own to participate in public policy discussions. The Federation advocates policies to Congress, U.S. and foreign government agencies, industry organizations, news media, and the public.

The Federation addresses policies concerning milk pricing, market development both domestic and international, agriculture credit and taxation, environmental issues, food safety and healthy animal welfare, product standards and labeling, and research and biotechnology.

The main objective of Federation policies is to improve the economic environment for dairy producers and the cooperatives they own. Achieving this objective assures consumers of adequate supplies of wholesome dairy products at affordable prices.
