## **NMPF's 2012 Antibiotic Residue Prevention Manual Now Available**

Updated Manual, Additional Materials Available Online for Free

ARLINGTON, VA – The National Milk Producers Federation (NMPF) announced today that it is releasing an updated version of the *Milk and Dairy Beef Drug Residue Prevention Manual* for 2012. One of the areas of focus for the National Dairy FARM Program™, the residue prevention manual can be found online at [www.nationaldairyfarm.com](http://www.nationaldairyfarm.com).

The *Milk and Dairy Beef Drug Residue Prevention Manual* is a concise review of appropriate antibiotic use in dairy animals. The manual is a quick resource to review those antibiotics approved for dairy animals, and also can be used as an educational tool for farm managers as they develop their on-farm best management practices necessary to avoid milk and meat residues. Additions to the 2012 version include a section on meat drug residue testing, an expanded list of products and risk factors for residues, as well as an updated drug and test kit list. The 2012 manual includes a certificate of participation that can be signed by a producer and their veterinarian to demonstrate their commitment to proper use of antibiotics on the dairy.

"The use of antibiotics in livestock is undergoing increased scrutiny, and this manual will help ensure that veterinary treatments are used appropriately," said Jerry Kozak, President and CEO of NMPF.

The dairy industry is committed to producing safe, abundant, and affordable milk and dairy beef of the highest quality. Healthy animals help make for safe food and disease prevention is the key to keeping cows healthy.

The National Dairy FARM Program was created by NMPF to demonstrate and verify that U.S. milk producers are committed to providing the highest levels of quality assurance including animal care, residue prevention, and other on-farm practices.

The Residue Prevention manual was sponsored by Charm Sciences, IDEXX, and Pfizer Animal Health. No check-off funds were used in the development and distribution of this manual.

###

The National Milk Producers Federation, based in Arlington, VA, develops and carries out policies that advance the well-being of dairy producers and the cooperatives they own. The members of NMPF's 31 cooperatives produce the majority of the U.S. milk supply, making NMPF the voice of more than 32,000 dairy producers on Capitol Hill and with government agencies. Visit [www.nmpf.org](http://www.nmpf.org) for more information.
